What my MBA

How we "think" about money is very different from how we "feel" about it. While separating the two on paper is easy, sticking to budgets, having financial conversations, calculating risk & reward, following investment plans, and preserving wealth is often challenging. This is why personal finance is so hard and making money decisions so tough.

What My MBA Did Not Teach Me About Money gives real and practical strategies to work around:

1. Money beliefs
 2. Hiccups in finance
 3. Navigating stock markets
 4. Overcoming our own biases &
 5. Navigating our vulnerabilities in those special situations when we are most likely to make money mistakes
- Each of the strategies presented in the book is derived from practical experiences of the authors' own lives and from advising their clients. This book is about bridging the gap between the "feeling" human perspective and the "thinking" financial perspective of money.
