2025 – THE YEAR THAT WAS!

FROM THE EDITOR

Markets are normally characterized by two states Bullish & Bearish. Rarely is the in-between phase i.e. the 'hibernation phase' spoken about just as some animals enter the hibernation phase to survive harsh winters by slowing their body functions, markets too hibernate during economic uncertainties.

Despite the market only flirting with the all time high of Sept-2024, 2025 was the 10th year where the Nifty gave positive returns, lagging the strong rallies that swept across global markets. The Nifty climbed just over 10% and the Sensex added 9%, as against Korea's 75% gains and Brazil's 34% upmove. Among sectors, public sector banks and metals led the winners, delivering returns of 30% and 29% respectively, while consumer-facing sectors and technology bore the brunt of the sell-off.

The Nifty has increased by more than 25000 points in the last 25 years despite major draw down in 2001, 2008, 2011 and 2015, only the four calendar years in which the Nifty gave negative return in the 25 years, thus growing by a CAGR of 12.51%. Despite the strong under performance by mid cap and small cap in 2025 they still remain clear out performers giving 10 years CAGR returns of 17.9% & 14.7% respectively out performing the index substantially.

The year gone by was defined by resilience amid pressure. Markets navigated a complex mix of global tightening, geopolitical risks, and capital flow volatility, yet domestic fundamentals provided a strong counter balance.

One of the standout themes was the bull run in bullion adding the household wealth by close to \$2 Trillion leading to tremendous 'Wealth Effect' and its positive impact on sentiments. Gold and silver emerged as preferred safe-haven assets as investors hedged against global uncertainty, geopolitical conflict, and currency volatility.

From a flows perspective, persistent FPI exits dominated 2025, with foreign investors pulling out nearly ₹1.6 trillion (US\$18bn) the highest annual outflow on record. This led to a decline in foreign ownership in Indian equities to multi-year lows. The Tug of war between FII's and DII's continues helped by the monthly SIP figures which fluctuate slightly month-to-month but have consistently stayed robust and over ₹28,000 crore in recent months as investors prefer disciplined investing.

The Macro variables played a decisive role in 2025:

- Oil prices moderated at times, easing import pressure
- FX reserves remained adequate, providing external stability
- CAD stayed manageable but sensitive to energy and commodity prices
- Fiscal deficit and inflation trends improved gradually
- Government capex remained a key growth driver

The year was also shaped by major global events ongoing wars, the Gaza conflict, tensions involving Iran, and the lingering overhang of Trump-era tariff risks, all contributing to risk-off phases across global markets. With inflation under control, RBI reduced the rates by 125 basis points, but the yield did not reduce due to the continued heavy borrowing by the states at higher interest rates thus denying the benefit pass over to retail and corporate borrowers.

On the domestic front, IPO activity surged, reflecting liquidity, investor risk appetite, and confidence in India's long-term growth story, even as valuations trended towards mean valuations through small & midcaps are still a tad higher but still on the expensive side.

Currency markets told their own story. The Indian rupee weakened ~4.7% in 2025 falling to below the Rs.90 mark, its sharpest annual decline in three years, pressured by FII outflows and external imbalances. Despite these headwinds, India closed the year with strong structural footing, setting the stage for what lies ahead.

As and when the Emerging Markets step out of hibernation, India may emerge as a likely winner given strong fundamentals and recent underperformance moderating overall valuations.

2026 – THE YEAR AHEAD?

The end of the previous year and the start of the New Year begins the deluge of forecasts. The best of forecast did not predict the happenings in Venezuela in the first week of January and the Trump threats to follow.

I am reminded here of a forecast. During the frenzied days of the dotcom boom, economist Kevin Hassett, who is now a front-runner to replace Jerome Powell as the Chair of the Federal Reserve, made an infamous forecast in 1999 that the Dow Jones will rise four-fold to 36,000 by 2002-04. In reality, it actually crossed 36,000 only in 2021! Thus forecast should be read with a pinch of salt.

As India enters 2026, the outlook is cautiously optimistic, supported by growth visibility, policy support, and domestic liquidity even as global risks remain elevated.

India's growth premium remains intact. Q2 FY25 GDP growth at 8.2% YoY reaffirmed India's position as the fastest-growing major economy. With government capex, resilient services, and improving manufacturing output, FY26 growth is expected to remain in the 6.5–6.8% range, despite global slowdown concerns.

A key positive is inflation cooling sharply, creating room for policy support. CPI forecasts for FY26 have been revised lower, with inflation trending well below the RBI's 4% target. This allowed the RBI to initiate rate cuts, supporting borrowing, liquidity, and household purchasing power.

Domestic liquidity through strong SIP inflows remains the market's structural anchor.

The banking system enters 2026 from a position of strength. Capital adequacy remains healthy, asset quality is at multi-decade lows (gross NPAs ~2.1%), and credit growth in the 11–12% range supports economic momentum.

High-frequency indicators reinforce domestic strength:

- UPI transactions hit record volumes
- GST collections crossed ₹1.84 lakh crore monthly average with consistent YoY growth, despite the GST rate cuts.
- Formalisation continues through rising tax compliance and filings
- Strong auto numbers and FMCG numbers should give a boost to consumption and then to private capex.
- GCCs continue to provide a major impetus to employment and capex.
- AI investment commitments by the Tech majors are already closed to \$100 Billion.
- 5 major states vying for a \$1 Trillion economy by 2030 leading to healthy competition for growth.

Politically, India enjoys a stability premium. With no major national elections in 2026 and policy continuity intact, long-term investor confidence remains supported.

Structurally, India may be entering a Goldilocks phase stable politics, manageable inflation, policy support, low oil prices and reform momentum aligning together. If global conditions stabilise, FII flows have room to return, adding upside to equities.

However, risks cannot be ignored. Key challenges for the year ahead include:

- Forecasting risks, especially around geopolitical shocks such as a potential US-Venezuela conflict and its spillover effects.
- Rising tariff wars and protectionism, which could disrupt supply chains and earnings visibility.
- US slowdown or recession risk, combined with debt and fiscal stress, which could tighten global liquidity.
- Trade deficit pressures and export weakness, despite short-term improvements.
- Currency volatility, following the rupee's weakness in 2025.
- Valuation sensitivity in small and mid caps, where earnings growth must justify prices.
- Financial stability risks from unregulated assets like cryptocurrencies.
- US AI bubble risk, where any sharp correction could trigger global risk-off sentiment.

In this environment, earnings growth will be the deciding factor. Valuations alone will not sustain markets growth will.

Gold and silver remain relevant, not as trades, but as strategic portfolio stabilisers in a world still searching for balance.

Interesting times indeed and reminded of a quote "Successful Investing is about managing risk and not avoiding it, it is about staying invested rather than watching from the side lines"

Let's start the year with renewed hope & strategy to achieve greater heights and may this be your best year ever.

May God give us the wisdom to know what must be done & the courage to do it and Make it Count in 2026

Have a Great 2026!
Sandeep Sahni
Editor

THE YEAR THAT WAS 2025

ECONOMIC HIGHLIGHTS

- 01 India became the world's 4th-largest economy in 2025, overtaking Japan, with a GDP of approx \$4.18 trillion.
- 02 RBI has raised India's GDP growth forecast from 6.8% to 7.3%, for FY2025-26.
- 03 India's forex reserves rise by \$58 bn to \$693.32 bn as of Dec 19 in CY2025.
- 04 India's MF industry achieved a record Rs 80.80 lakh crore in AUM marking a 18.7% (y-o-y) growth till Nov.
- 05 MCX gold hits fresh record of ₹1,39,550/10g in year-end surge, silver jumps to ₹2,35,247/Kg.
- 06 Transaction value surge for the UPI at record high at ₹266.68 lakh crore from Jan to Nov 2025.
- 07 RBI significantly reduced the repo rate, starting at 6.50% and ending the year at 5.25% as of December 2025.
- 08 SIPs inflow in MF top 3 trn for the first time in a calendar year till Nov 2025.
- 09 DII's Hit Record 18.26% Ownership, DII's Pump ₹7.72 Lakh Crore into Indian Markets in 2025.
- 10 Indian Demat Accounts at a record, Touch 21.28 Cr till Nov 2025.

BULLS VS BEAR

Bull Case (Positives for the Market)

India's growth premium remains intact: India entered 2026 with strong growth visibility Q2 FY25 GDP stood at 8.2% YoY, keeping India the fastest-growing major economy. Government capex, services strength and improving manufacturing output supported confidence that FY25 growth would remain around 6.5–6.8%, despite global slowdown concerns.

Inflation at record lows & policy support: Retail inflation forecasts have been sharply lowered by RBI — FY26 CPI now at 2.0% (vs 2.6% earlier), with Q3 FY26 at 0.60% and Q4 FY26 at 2.90%. With inflation well below the 4% target, RBI has already cut policy rates by 25 bps in Dec 2025, supporting borrowing, liquidity and real purchasing power for households.

Domestic liquidity as a structural anchor: One of the biggest positives entering 2026 was the structural shift in market ownership. Monthly SIP inflows stayed above ₹29,445 crore by Nov 2025, cushioning markets during FII selling phases. This domestic liquidity reduced drawdown risk and reinforced India's buy-on-dips market character.

Banking system strong & credit cycle supportive: Indian banks are well-capitalised and resilient, with RBI stress tests showing no breach of capital norms and asset quality at multi-decade lows (gross NPAs ~2.1%). Credit growth remains healthy (~11–12% YoY), supporting lending and sustaining economic momentum.

UPI & GST signal strong domestic activity: UPI transactions hit a record 21.6 billion worth ₹28.25 trillion in Dec-25, while GST collections rose to ₹1.75 lakh crore (+6.1% YoY), highlighting resilient consumption, formalisation and sustained economic momentum.

Political stability premium: With no major national elections in 2026 and a strong mandate already in place, India enjoyed a political stability premium, unlike several global peers facing policy uncertainty. This supports long-term investor confidence.

Formalisation of the economy: Rising GST collections and ITR filings reflect rapid formalisation of the economy, bringing more businesses and income into the tax net. This improves revenue visibility, compliance, and policy effectiveness, strengthening long-term growth quality and investor confidence.

India's Goldilocks Moment — Stability, Reforms & Capital Upside: With political stability and no major elections, continued structural reforms, and deepening formalisation of the economy, India is entering a potential Goldilocks phase. As global conditions stabilise, FII flows have room to return, supported by strong domestic liquidity, improving policy visibility, and resilient growth.

Valuation comfort supports upside: With benchmark indices trading near their long-term mean valuations, downside risks from overvaluation are limited. Combined with political stability, ongoing reforms and strong domestic liquidity, this improves the risk-reward profile and supports earnings-led market upside.

Bear Case (Negative for the Market)

Rising tariff wars & protectionism risk: A shift from open trade toward protectionist policies and tariff wars could disrupt global supply chains, raise input costs, and slow cross-border trade. For open, trade-linked economies, this increases export uncertainty, inflationary pressures and earnings risk, while dampening global growth and investor confidence.

US growth slowdown / recession & debt risk: A weakening US economy or recession, combined with rising US sovereign debt and fiscal stress, could disrupt global liquidity and risk appetite. Given the US's central role in global finance, such a scenario typically leads to FII outflows, dollar volatility, currency pressure and equity corrections in emerging markets, transmitting stress across global financial markets.

Trade deficit pressure and export weakness: Although India's merchandise trade deficit narrowed to \$24.5 bn in Nov-25 from \$41.7 bn in Oct-25 due to lower gold and oil imports, the FY26 cumulative deficit (Apr–Nov) remains wider YoY, keeping external balance and export momentum under pressure.

Indian rupee sharply weakened in 2025: The Indian rupee experienced its worst annual drop in three years, depreciating ~4.7% in 2025 and ending at ₹89.87 per USD, illustrating steady downward pressure on the currency. This was linked to persistent foreign equity outflows and external imbalances.

Persistent Foreign Institutional Investor (FII) outflows: Foreign portfolio investors (FPIs/FIIs) pulled out ~₹1.6 trillion (~US\$18bn) from Indian equities in calendar 2025 — the highest annual outflow on record. Foreign ownership in Indian equities fell to ~16.9% by Sept-2025, described as a 15-year low.

Business confidence drops: India's HSBC Services PMI fell to 58.0 in December, its weakest expansion in 11 months from 59.8 in November, showing moderation in sector activity also Composite PMI, including manufacturing activity which slowed to its weakest pace in two years, fell to 57.8 in December from 59.7 in November, marking an 11-month low.

Rise of new financial assets like cryptocurrencies and stablecoins: crypto and stablecoins are growing faster than regulations, creating gaps in supervision flagged by global authorities. Central banks and regulators have warned that weak crypto and stablecoin rules can threaten financial stability.

US AI bubble risk: The US market's rally is heavily concentrated in a few AI-led stocks with higher valuation. Any sharp correction could trigger global risk-off sentiment, leading to FII outflows and higher volatility in Indian equities.

Bond Yields Resist Policy Easing: Despite RBI cutting the repo rate by 125 bps in CY25 10-year govt. bond yield fell only modestly (~20–30 bps overall) and remained stubbornly high around ~6.5–6.6%. This divergence creates risk for the economy by raising borrowing costs for long-term investment, dampening credit growth, and limiting the effectiveness of RBI's support for growth.

25 BEST VIDEOS I WATCHED IN 2025

We live in an age of endless content, but meaningful content is rare. Over the years, I have become intentional about what I watch — not for entertainment alone, but for learning, reflection, and perspective.

In 2025, the videos I chose to watch were conversations, interviews, lectures, and deep discussions — many centred around investing, decision-making, human behaviour, leadership, and life philosophies. Some reaffirmed beliefs I already held; others disrupted them.

What stood out was not production quality, but depth. These videos carried lived experience, long-term thinking, and intellectual honesty. They reminded me that wisdom often comes from those who have endured cycles, mistakes, and uncertainty.

Watching these videos felt less like consumption and more like mentorship at scale. They offered frameworks instead of predictions, principles instead of shortcuts. In a world obsessed with outcomes, they spoke about process.

Many of these videos stayed with me long after they ended — influencing conversations, decisions, and reflections weeks later. That, to me, is the mark of good content: it doesn't end when the screen turns off.

I'm sharing these 25 videos not as recommendations alone, but as resources that shaped my thinking in 2025. If you find even one that helps you think clearer, act wiser, or stay calmer — it's worth your time.

Keep watching thoughtfully. Keep learning intentionally.

The right ideas, at the right time, can change everything.

25 BEST ARTICLES I READ IN 2025

Reading has never been about information alone for me — it has always been about perspective. Over the years, I have realised that the quality of what we read quietly shapes the quality of our thinking, our decisions, and eventually our lives.

In 2025, I continued my habit of reading consistently — articles across economics, investing, behaviour, psychology, public policy, and life itself. Some were written by seasoned thinkers, some by sharp observers, and some by people who simply articulated truths most of us feel but cannot express. What united them was not brilliance alone, but clarity of thought.

Many of these articles challenged comfortable beliefs. A few made me pause mid-sentence and rethink long-held assumptions. Some reinforced principles I already believed in — patience, long-term thinking, humility, and discipline. Reading them reminded me that learning does not always shout; often, it whispers.

Charlie Munger once said that continuous learning is what compounds over time. I have found that to be profoundly true. Articles read during early mornings, between meetings, during travel, or late nights became anchors — helping me recalibrate when noise felt overwhelming.

These readings did more than educate me; they grounded me. They helped me separate signal from noise, urgency from importance, and trends from fundamentals. In a world that rewards speed, reading taught me the value of slowness.

Sharing these 25 articles from 2025 is my way of acknowledging the authors who unknowingly contributed to my thinking this year. If even one article nudges you to reflect, question, or grow — the purpose is served.

Keep reading. Keep questioning. Keep learning.

Knowledge compounds quietly, but its impact lasts a lifetime.

25 OF MY FAVOURITE BLOGS I WROTE IN 2025

Writing, for me, has never been about numbers, reach, or algorithms. It has always been about showing up – every day – with honesty, intention, and responsibility.

In 2025, I continued a practice I began many years ago: writing consistently, without waiting for motivation. Some days the words flowed easily; some days they did not. But discipline carried me forward when inspiration was absent.

These blogs were written during early mornings, between packed schedules, and often after long days. Each post was an attempt to simplify complex ideas – money, mindset, resilience, habits, and values – into something practical and relatable. Not to impress, but to serve.

What continues to humble me is the feedback. Messages from readers who say a blog helped them stay patient during a tough phase, make a better financial decision, or simply feel less alone – those moments outweigh any metric.

Writing has taught me clarity. When you write regularly, you cannot hide behind vague thinking. Every sentence forces structure. Every post demands accountability. Over time, this process sharpens not just communication, but character.

These 25 blogs are my personal favourites from 2025 – not because they performed the best, but because they reflect growth, learning, and sincerity. They represent ideas I believe in deeply and lessons life reinforced repeatedly this year.

If these words reach you at the right time and offer even a small shift in perspective, the effort is worth while.

Keep believing. Keep showing up.

Consistency, when guided by purpose, always finds its way.

Harry S. Truman once said, "Not all readers are leaders, but all leaders are readers."

You've no doubt seen a plethora of top 10 book lists published by Presidents, renowned CEOs, successful entrepreneurs & Officers.

I don't believe it is a coincidence that so many great leaders prioritize reading.

No CEO wakes up one day with all the knowledge needed to become successful. Most great leaders are insatiable readers in constant pursuit of knowledge and personal development.

At any point of time I am reading 3-4 books and I love the Non-fiction books on my business subject of finance and money & the Self-help Genre.

The power of this genre is that they are personal accounts of real situations with tested solutions for others who are experiencing similar challenges.

The authors have done the hard work; they have tested, failed and triumphed, and they are gifting this knowledge to other for the cost of one or two specialty coffees and a few hours of reading time.

I am grateful for their willingness to share, and I will continue to prioritize reading, using the power of words to enhance my skills and grow.

For those who want to become better leaders & persons, and grow their businesses, I recommend designating a reading "Power Hour" several times a week.

Put it on your calendar as you would a meeting, find a quiet space and turn off all electronic devices.

Using insights from 'Atomic Habits,' perhaps you can stack this activity with another routine.

If you work out for half an hour five days a week, then spend 30 minutes reading as soon as you are finished.

If you have a long commute to work, maybe an audiobook or podcast would be a good fit.

Regardless of when, how long or where you read, just be sure you are routinely consuming content that will make you a better person.

For me, Reading isn't just a habit; it's also a master key to unlocking a future brimming with boundless possibilities—a journey every page invites you to join.

Start your reading journey today.

Begin a paragraph, then a page, then a chapter & soon you will be completing the book...

25 Lessons from 2025...

(The stock market and life taught us)

1

Investing is a patience game.

2

Benign macros and falling interest rates don't necessarily lead to rising markets.

3

Buying at the right price is important.

4

Gold and silver can deliver unexpected returns.

5

It is not about timing the market, but time in the market.

6

Asset allocation is king.

7

Diversification is the best strategy.

8

Indian markets can underperform the other emerging markets.

9

Nominal and real GDP can converge.

10

The yen carry trade can unwind, leading to chaos.

11

Crypto are not a one-way ride.

12

History doesn't repeat itself, but it does rhyme.

13

Market leadership can be tested.

14

Staying the course can pay off.

15

Be selective amid elevated valuations.

16

Don't underestimate Trump.

17

The AI investment theme is here to stay.

18

Process matters more than predictions.

19

The next cycle will be about rotation, not direction.

20

Markets can be more resilient than we can be.

21

Volatility is the nature of this beast.

22

Don't react to the news. Ignore the noise.

23

Traditional diversification methods need to be rethought.

24

Wars last longer than we think.

25

No Action is the best Action - Avoid Action Bias.

THE MONTH THAT WAS DECEMBER 2025

ECONOMIC HIGHLIGHTS

- 01 GST collections in Dec rose 6.1% (y-o-y) to ₹1.75 lakh Cr.
- 02 UPI transaction volumes have hit record highs, with seeing 21.63 bn transactions (up 29% y-o-y) in Dec 2025
- 03 India manufacturing PMI slows to two-year low of 55.00 in Dec.
- 04 India's peak power demand surged to 236 Gigawatts (GW) in Dec 2025.
- 05 India's net direct tax collections rise 8% to ₹17.05 lakh Cr. till Dec 17, 2025.
- 06 The Fed Reserve cut interest rates by 25 basis points in December marking 3rd cut of the year.
- 07 Cabinet Clears Bill Seeking 100% FDI In Insurance Sector.
- 08 India services PMI slips to 11-month low of 58.0 in dec 2025.
- 09 Small business credit exposure has reached Rs 46 lakh crore, an increase of 16% as of September 30.
- 10 India's fuel consumption surge 5.3% (y-o-y) to 21.75 million metric tons in December 2025.

CHART BUSTER

TRENDS AND TRAILS

CHARTS TO HELP YOU MAKE SENSE OF THE CURRENT MARKET IN TERMS OF VALUATIONS AND RETURN POTENTIAL

● Max ◀ Current ● Median ● Min

Sensex's 10-year journey

- The Sensex is a reliable gauge of the Indian market's overall performance.
- The 10-year graph shows a secular market rally, interrupted by several bearish phases.
- Key setbacks include Chinese growth concerns (2015), demonetisation (2016), US-China trade tensions (2018) and the Covid-19 crash (March 2020).
- After a strong recovery post-March 2020, the market dipped due to the Russia-Ukraine conflict and rising interest rates.
- After touching new lifetime highs in 2024, the Sensex is now stuck in a consolidation phase.

Sensex dividend yield

Dividend yield represents the return an investor earns through dividends. It is calculated as the dividend per share divided by price per share. Typically, higher dividend yields indicate cheaper stock prices.

If:
Dividend yield < Median dividend yield = Overvalued
Dividend yield > Median dividend yield = Undervalued

Sensex price-to-earnings ratio

The **price-to-earnings (P/E)** ratio of the Sensex is a straightforward indicator of market valuation. Below is a general valuation guide:

P/E	Valuation
12	Deeply undervalued (attractive buy)
16	Fairly valued
20	Significantly overvalued (high-risk zone)
24	Overvalued

This chart uses standalone data for Sensex companies. If consolidated figures are considered, the P/E ratio would likely be lower.

Market cap-to-GDP

The **market cap-to-GDP** ratio is Warren Buffett's favourite valuation metric, calling it "the best measure of market valuations at any given moment."

If:
Market cap > GDP = Overvalued
Market cap < GDP = Undervalued

Considering the cumulative market cap of BSE-listed companies and the nominal GDP estimates: final for FY23, first revised for FY24 and second advanced for FY25.

Sensex price-to-book ratio

The **price-to-book (P/B)** ratio reflects what investors are willing to pay for each rupee of net assets. With book value being more stable than earnings, it's often considered a better valuation measure than P/E.

If:
P/B > Median P/B = Overvalued
P/B < Median P/B = Undervalued

10Y G-sec yield gap to Sensex earnings yield

The **spread** between the 10-year government bond yield and Sensex earnings yield (inverse of P/E) is a key valuation metric. A significant deviation from the median indicates the degree of the Sensex's overvaluation or undervaluation.

If:
Spread > Median = Overvalued
Spread < Median = Undervalued

26 Tasks every PFP (Personal Finance Professional) Must Do in 2026 to Raise The Game

1

Treat your business like a business – Invest in your business.

2

Make a Business plan – Create a 1 year, 3 year and 5 year Rolling Plan and have S.M.A.R.T. goals.

3

Revisit your Vision Mission statement.

4

Do a SWOT Analysis of your business.

5

Review your Values that you abide by in your business.

6

Revisit your Brand and what it signifies.

7

Identify things you will not do.

8

Follow the 3i model – Insurance, Investment and Inheritance for a comprehensive solution to clients.

9

Identify and focus on your Growth drivers.

10

Fill the gaps in Infrastructure and Team required to achieve business goals.

11

Adopt the Client First policy – offer solutions not products.

12

Create a Blue team at your work – one who will question every hypotheses that you follow.

13

Follow the 777 Discipline – 7 new prospect meetings, 7 client reviews and 7 hour training and upskilling every week.

14

Create 'Lollipop moments' – do that little extra for clients.

15

Create an Operations Manual – Standardize and automate, create templates & Pro tools.

16

K.I.S.S. – Keep it Super Simple

17

Review your Business Performance every quarter and rebalance as required

18

Don't ignore your Personal Finance – pay yourself first.

19

Show up on bad days.

20

Attend minimum 3 Outstation conferences and 100 hrs of personal upskilling a year.

21

Remember Every small bit matters – Everything above zero compounds.

22

Take one 'Think Week' break a year.

23

Ignore the noise – Focus on what matters.

24

Don't fall into the 'Productivity Paradox' – don't work longer and get less done.

25

Raise the bar – Become a Better Person.

26

Spend time with family.

26

Things I Will Do In 2026

1

Read at least 26 books

2

Publish 3 Books (manuscripts are ready, just need to give it a final shape)

3

Send out a motivational blog

4

Take a "Think Week" break in the first quarter.

5

Take a minimum of three holidays:

- one with family
- one with friends
- one just with wife

6

Conduct 12 IAPs

7

Coach for a minimum of 100 hours to inspire coaches to achieve their potential

8

Walk a minimum of 3 million steps or on an average of 10000 steps a day

9

Do Yoga on 150 days in a year

10

Donate 10% of time effort and earnings to charity – (tithing)

11

Make a budget and track all spending

12

Invest 40% of earning for the future goals

13

Make a business plan

14

Create a vision board to visualize all goals

15

Make a 1,3,5,10 year life plan – Define ---- Ikagai

16

Read 25000 words a day

17

Attend 6 outstation conferences and 26 webinars

18

Obtain at least two certifications related to work

19

Create a passive income

20

Lose 8-10 kgs and by portion control and healthy eating.

21

Read or listen to content that promotes a growth and abundance mindset

22

Decide on things that I will not do and follow it strictly.

23

Create a routine for regular family Meets.

24

Clear all debts – Be debt free

25

3 Comprehensive Health check ups and consultations.

26

Create a "ME" timetable and a "WE" timetable with family and friends

26 Productivity Hacks For An Amazing 2026

1

Spend time in rooms where you feel like the dumbest one in the room. Small hit to the ego huge boost to growth.

2

Create an 'Idea Folder' where you post interesting ideas

3

Create a happiness Jar and every time you are happy post a note in the jar and relieve the memory when you are feeling down.

4

Journal every night for 10 minutes – write down all you did, achieved and missed

5

Spend 15 minutes every evening preparing for the tasks for next day

6

Develop and Master an elevator pitch

7

Keep Prospecting – If you don't ask you don't get

8

Read 10 pages per day on the subject of your choice

9

Praise someone when you notice something nice about them

10

Go for a 15 minute walk after lunch and dinner and 30 minutes walk before breakfast

11

Take a "Think Week" break

12

First 60 minutes at work should be totally non digital

13

Deliver more than you promise

14

Spread positivity – Be an encourager

15

Have a "ME" time routine – spend time with yourself

16

Don't sweat the small stuff... and it's all small stuff.

17

Keep reinventing yourself – evolve constantly to stay relevant

18

Be bold – confidence attracts success

19

Do detailing – the Devil lies in the detail

20

Act like a King – Demand respect by showing self respect

21

Be punctual – Don't make people wait

22

Always give more in value than what you get in return

23

Follow the "Tithing" Principle – Give 10% of your time, effort and wealth to charity

24

Take calculated risks

25

Be happy

26

Don't imitate others – their goals are different

26 Things to remember in 2026

1

Prayer is not enough, you need action.

2

Faith is not enough, you need work.

3

Dreaming is not enough, you need planning.

4

Planning is not enough, you need execution.

Upskilling is the best response to growth.

24

Faith is the best response to fear.

25

Giving is the best response to receiving.

26

Learning is the best response to ignorance.

26 Prayers For Your Most Amazing New Year

1

That you recall
how strong you
are.

2

That you turn
uncertainty
into creativity.

3

That you use
messy times to
grow.

4

That you
prefer honour
to fame.

5

That you
transform fear
into faith.

6

That you trust
your truth.

7

That you do
work that
moves the
world.

8

That you adore
your loved
ones.

9

That you seek
out beauty
daily.

10

That you do
no evil.

11

That you
never stop
improving.

12

That you
become too
kind.

13

That no one can
ever step on
you.

14

That you be
more gentle
with yourself.

15

That you see
wisdom as
wealth.

16

That you live
up to your
potential.

17

That you leave
the safe
shores &
embark on
new
adventures.

18

That you
make the
world a better
place.

19

That you Keep
your inner
child alive.

20

That you find
the happiness
within.

21

That you ask
for what you
want.

22

That you
prioritise what
matters to you
most.

23

That you
achieve the
peak of your
health.

24

That you
decide on how
much is
enough.

25

That you
become a
lifelong learner.

26

That you
achieve all
that your
heart desires.

MOVIE OF THE MONTH...

Dumb Money (2023)

A timely drama about the 2021 GameStop short squeeze where retail investors challenged hedge funds using social media and trading apps. Great for understanding modern market dynamics and community-driven investing.

Gyan

January Barometer

A theory that the stock market's performance in January predicts how it will perform for the rest of the year.

Kahaani

The 10-10-10 Rule

I'm always on the lookout for tools that allow me to act more decisively when faced with bigger decisions in my personal and professional lives.

The 10-10-10 Rule—a simple decision-making framework created by author and speaker Suzy Welch—is one of my favorite new tools I've come across.

The idea is that you pause and evaluate your decision across three timeframes:

10 Minutes: How will you feel about this decision in 10 minutes?

10 Months: How will you feel about this decision in 10 months?

10 Years: How will you feel about this decision in 10 years?

The 10-10-10 Rule functions as a neat, structured approach that allows you to create new perspective on the short and long-term impact of a decision or course of action.

If you're going to make an impulsive short-term decision, the 10-10-10 Rule forces you to consider the long-term ramifications.

The most valuable things in life come from playing long-term games, so while there are some cases where acting for the short-term will be appealing, choosing to make big decisions that take into account your 10 year future self is the best approach.

Warren Buffett, the world's most famous investor, credits some of his best decision making to 10-10-10 Rule.

So, the next time you're faced with a bigger decision, walk through this exercise:

With each potential course of action, how will you feel about it in 10 minutes? 10 months? 10 years?

Do that and you'll find yourself making better decisions that compound positively toward the future you are trying to build.

Use the Rule to make great decisions.

The Sahayak Investment Dictionary

YOUR ESSENTIAL COMPANION
FOR
SMART FINANCIAL DECISIONS

Do you understand the term, 'BAP' or 'GAR' in Investing?
What is the relevance of term 'Gazelle' and why should 'Barnie', 'Betty' and 'Loonie' be included in an Investment dictionary?
Do 'To the moon', 'BTDF' and 'HODL' baffle you?
Are you confused by 'XIRR', 'CAGR' and 'Naked Call' and
Do you stare in wonder when your advisor talks about
'V shaped recovery' and 'K shaped recovery'?

In a world flooded with market buzzwords, complex jargon, and ever-changing financial products, understanding the language of investing is the first step to making confident decisions.

The Sahayak Investment Dictionary cuts through the noise.
It simplifies hundreds of financial and investment terms — from the basics of savings and mutual funds to advanced market concepts — into clear, practical explanations you can trust.

Whether you are a first-time investor, a seasoned market participant, or simply someone curious about the world of finance, this book is designed to guide you. It helps you see beyond the buzz, understand the essentials, and build a foundation for informed and thoughtful investing.

A resource built on Sahayak's experience in guiding investors, this Dictionary empowers you to learn, grow, and navigate the financial world with clarity.

Knowledge is the first step toward financial freedom.
Start your journey with
'The Sahayak Investment Dictionary.'
